

About the Saudi Green Initiative

The Saudi Green Initiative will chart a path for the Kingdom of Saudi Arabia in protecting the planet.

It will improve quality of life and protect future generations by increasing reliance on clean energy, offsetting the impact of fossil fuels and protecting the environment. Through the Middle East Green Initiative, Saudi Arabia will spearhead regional efforts to achieve global targets to combat climate change.

Increase the share of energy from renewables from 0.3% to 50% by 2030

Reduce carbon emissions by more than 4% of global contributions

Raise the percentage of protected areas to more than 30% of Saudi Arabia's total land area

Plant 10 billion trees in Saudi Arabia

As a leading global oil producer, we recognize our share of responsibility in advancing the fight against climate change. This global crisis is already impacting our environment and the lives of people in Saudi Arabia.

Our ambitious plan to deliver sustainable change in Saudi and beyond is underpinned by six pillars:

Grow the clean energy sector

Reduce carbon emissions

Protect our oceans

Defend our wildlife

Prevent desertification

Increase recycling
